

Relief Teacher Daily Plan — Thursday 17 June

Hi Dianne, welcome! The students know our routines well. Everything below is optional/flexible—please adapt the day as you see fit.

Daily Flow at a Glance

Session	Focus	Quick Notes
Morning	Maths	Maths Command Station website (bug testing) and/or optional sheets.
Middle	English	Writing a short information report on a topic of their choice.
Afternoon	Choice Time	VS Code (Vibe Coding) or Minecraft (end-of-day reward).
End of Day	Pack Up	Tidying up, closing devices, and a quick reflection.

Morning Session: Maths (Options)

Please do all, some, or none of these—whichever keeps them engaged.

- **Option A: Maths Command Station (Website)**
 - **Location:** Curriculum G → Common → Websites_ → Maths_Command_station → index.html
 - **Note:** The kids love this site but it is a bit buggy. They know they are helping “bug test” it. If it glitches, they can write it down for me. If it behaves too weirdly, feel free to switch to worksheets or quiet reading.
 - **Option B: Maths Sheets (Signpost Maths 5)**
 - Three optional sheets are in the folder: **Page 33** (estimating addition), **Page 34** (addition algorithm with trading), and **Page 35** (subtraction with trading). Students can work at their own pace.
-

Middle Session: English (Information Reports)

Students will write a short information report on a topic of their choice. They should complete this on the dedicated page in the **English section of their OneNote** (pre-created for them).

Suggested Flow & Checklist

1. **Intro & Plan (10 mins):** Remind them of report features (facts, subheadings). Students choose a topic and plan.
 2. **Writing (40 mins):** Quiet, independent writing in OneNote.
 3. **Editing (10 mins):** Students check their work against the list below before finishing.
 - **Must-Haves:** [] Clear title [] Intro paragraph [] Grouped facts with subheadings [] Topic-specific words [] Conclusion [] Checked spelling & capitals.
 - **Optional Extras:** Labelled diagrams, “fun facts” box, glossary, timeline, or map.
-

Afternoon Session: Choice Activities

- **Option 1: Vibe Coding in VS Code:** Students can work on their approved coding projects in VS Code (fixing bugs, adding comments, improving layout).
 - **Option 2: Minecraft (Reward):** If behaviour has been good throughout the day, they can play Minecraft at the end of the afternoon. (Expectations: school-appropriate worlds, cooperative play, no griefing). If behaviour slips, they return to quiet reading or coding.
-

Classroom Guide & Expectations

- **Devices:** Only have tabs open that are related to their current task (maths site, OneNote, or VS Code).
 - **Early Finishers:** Can read quietly, continue coding, or add extra features (glossary, diagrams) to their reports.
-

Notes for Me (Feedback)

Dianne, please leave a quick note on how the maths website held up, how the reports went, and any notable behaviour or student achievements. Thanks so much!
