Year Level/s:	6	Type:	Master
Class:			
Learning Area/ Subject:	Humanities and Social Sciences		Teachers: Corporate

Unit Plan

Australia in a diverse world

In this unit students will investigate the following key inquiry question:

- *How do places, people and cultures differ across the world?*

Students will:

- examine the geographical diversity of the Asia region and the location of its major countries in relation to Australia
- investigate differences in the economic, demographic and social characteristics of countries across the world
- consider the world's cultural diversity, including that of its indigenous peoples
- identify Australia's connections with other countries
- organise and represent data in large- and small-scale maps using appropriate conventions
- interpret data to identify, describe and compare distributions and trends
- present ideas, findings and conclusions in a range of communication forms that incorporate source materials, mapping, communication conventions and discipline-specific terms.

For further information to support teaching of the unit, view the:

- [Year level plan](#)
- [Teacher lesson overview](#)

Throughout the unit, ensure all students have opportunities to develop their higher-order thinking skills. Students develop skills in thinking when they are encouraged to reflect, inquire, generate, and analyse, synthesise and evaluate. Resources that support higher-order thinking skills:

Australian Curriculum

F-6/7 HASS- Year 6

Year 6 Achievement Standard

By the end of Year 6, students explain the significance of an event/development, an individual and/or group. They identify and describe continuities and changes for different groups in the past and present. They describe the causes and effects of change on society. They compare the experiences of different people in the past. Students describe, compare and explain the diverse characteristics of different places in different locations from local to global scales. They describe how people, places, communities and environments are diverse and globally interconnected and identify the effects of these interconnections over time. Students explain the importance of people, institutions and processes to Australia's democracy and legal system. They describe the rights and responsibilities of Australian citizens and the obligations they may have as global citizens. Students recognise why choices about the allocation of resources involve trade-offs. They explain why it is important to be informed when making consumer and financial decisions. They identify the purpose of business and recognise the different ways that businesses choose to provide goods and services. They explain different views on how to respond to an issue or challenge.

Students develop appropriate questions to frame an investigation. They locate and collect useful data and information from primary and secondary sources. They examine sources to determine their origin and purpose and to identify different perspectives in the past and present. They interpret data to identify, describe and compare distributions, patterns and trends, and to infer relationships, and evaluate evidence to draw conclusions. Students sequence information about events, the lives of individuals and selected phenomena in chronological order and represent time by creating timelines. They organise and represent data in a range of formats, including large- and small-scale maps, using appropriate conventions. They collaboratively generate alternative responses to an issue, use criteria to make decisions and identify the advantages and disadvantages of preferring one decision over others. They reflect on their learning to propose action in response to an issue or challenge and describe the probable effects of their proposal. They present ideas, findings, viewpoints and conclusions in a range of communication forms that incorporate source materials, mapping, graphing, communication conventions and discipline-specific terms.

Content Descriptions

Inquiry and skills

Evaluating and reflecting

- Evaluate evidence to draw conclusions ([ACHASSI129](#))

Analysing

- Interpret data and information displayed in a range of formats to identify, describe and compare distributions, patterns and trends, and to infer relationships ([ACHASSI128](#))

Communicating

- Present ideas, findings, viewpoints and conclusions in a range of texts and modes that incorporate source materials, digital and non-digital representations and discipline-specific terms and conventions ([ACHASSI133](#))

Knowledge and Understanding

Geography

- Differences in the economic, demographic and social characteristics of countries across the world ([ACHASSK139](#))
- The geographical diversity of the Asia region and the location of its major countries in relation to Australia ([ACHASSK138](#))
- The world's cultural diversity, including that of its indigenous peoples ([ACHASSK140](#))

Unit Plan

Plan Name: Unit 3 - HASS Year 6 (V8)

Year: 6

Status: Master

Learning Area/Subject: Humanities and Social Sciences

Duration: 8 Weeks

<i>Researching</i> • Locate and collect relevant information and data from primary sources and secondary sources (ACHASSI123) • Organise and represent data in a range of formats including tables, graphs and large- and small-scale maps, using discipline-appropriate conventions (ACHASSI124)	
---	--

Unit Plan**Plan Name: Unit 3 - HASS Year 6 (V8)****Year:** 6**Status:** Master**Learning Area/Subject:** Humanities and Social Sciences**Duration:** 8 Weeks**Curriculum Priorities - Pedagogy****Considerations****Prior and future curriculum****Relevant prior curriculum**

Students require prior experience with the following:

- Locate and collect relevant information and data from primary sources and secondary sources (ACHASSI095)
- Organise and represent data in a range of formats including tables, graphs and large- and small-scale maps, using discipline-appropriate conventions (ACHASSI096)
- Interpret data and information displayed in a range of formats to identify, describe and compare distributions, patterns and trends, and to infer relationships (ACHASSI100)
- Evaluate evidence to draw conclusions (ACHASSI101)
- Present ideas, findings, viewpoints and conclusions in a range of texts and modes that incorporate source materials, digital and non-digital representations and discipline-specific terms and conventions (ACHASSI105)

Curriculum working towards

The teaching and learning in this unit work towards the following:

- Apply a methodology to locate and collect relevant information and data from a range of primary sources and secondary sources (ACHASSI153)
- Organise, categorise and represent data in a range of appropriate formats using discipline-specific conventions, including different types of graphs, tables, field sketches and annotated diagrams, and maps at different scales (ACHASSI154)
- Examine primary sources and secondary sources to determine their origin, purpose and reliability (ACHASSI156)
- Interpret and analyse data and information displayed in a range of formats to identify and propose explanations for distributions, patterns, trends and relationships (ACHASSI158)
- Evaluate and synthesise evidence to draw conclusions (ACHASSI159)
- Present ideas, findings, viewpoints, explanations and conclusions in a range of texts and modes that incorporate source materials, citations, graphic representations and discipline-specific terms, conventions and concepts (ACHASSI163)

Unit Plan**Plan Name: Unit 3 - HASS Year 6 (V8)****Year:** 6**Status:** Master**Learning Area/Subject:** Humanities and Social Sciences**Duration:** 8 Weeks**General capabilities**

This unit provides opportunities for students to engage in the following general capabilities.

Literacy

- Comprehending texts through listening, reading and viewing
- Composing texts through speaking, writing and creating
- Word knowledge

Numeracy

- Using spatial reasoning
- Interpreting statistical information

Critical and creative thinking

- Inquiring - identifying, exploring and organising information and ideas
- Generating ideas, possibilities and actions
- Reflecting on thinking and processes
- Analysing, synthesising and evaluating reasoning and procedures

Personal and social capability

- Self-management

Intercultural understanding

- Recognising culture and developing respect

For further information, refer to General capabilities in the Australian Curriculum and the Learning area specific advice.

Unit Plan**Plan Name: Unit 3 - HASS Year 6 (V8)****Year:** 6**Status:** Master**Learning Area/Subject:** Humanities and Social Sciences**Duration:** 8 Weeks**Cross-curriculum priorities****Cross-curriculum priorities****Aboriginal and Torres Strait Islander histories and cultures**

Students will develop a knowledge, deep understanding and respect for Aboriginal peoples' and Torres Strait Islander peoples' history and culture and build an awareness that their histories are part of a shared history belonging to all Australians.

The embedding of Aboriginal peoples' and Torres Strait Islander peoples' histories and cultures into the curriculum can be a challenging task. For further information including pedagogical approaches refer to [C2C: Aboriginal peoples & Torres Strait Islander peoples Cross Curriculum Priority support](#).

Asia and Australia's engagement with Asia

Students will learn about and recognise the diversity within and between the countries of the Asia region. They will develop knowledge and understanding of Asian societies, cultures, beliefs and environments, and the connections between the peoples of Asia, Australia, and the rest of the world. Students will develop skills to communicate and engage with the peoples of Asia so they can effectively live, work and learn in the region.

For further information, refer to Asia and Australia's engagement with Asia in the Australian Curriculum and the Learning area statements.

Unit Plan**Year:** 6**Learning Area/Subject:** Humanities and Social Sciences**Plan Name:** Unit 3 - HASS Year 6 (V8)**Status:** Master**Duration:** 8 Weeks**Assessing student learning****Assessment name:** Australia in a diverse world

Assessment description: Students demonstrate an understanding of the diversity of places by representing, interpreting and describing data and information about the characteristics of places.

In this unit, assessment of student learning aligns to the following aspects of the achievement standard.

By the end of Year 6, students explain the significance of an event/development, an individual and/or group. They identify and describe continuities and changes for different groups in the past and present. They describe the causes and effects of change on society. They compare the experiences of different people in the past. Students describe, compare and explain the diverse characteristics of different places in different locations from local to global scales. They describe how people, places, communities and environments are diverse and globally interconnected and identify the effects of these interconnections over time. Students explain the importance of people, institutions and processes to Australia's democracy and legal system. They describe the rights and responsibilities of Australian citizens and the obligations they may have as global citizens. Students recognise why choices about the allocation of resources involve trade-offs. They explain why it is important to be informed when making consumer and financial decisions. They identify the purpose of business and recognise the different ways that businesses choose to provide goods and services. They explain different views on how to respond to an issue or challenge.

Students develop appropriate questions to frame an investigation. They locate and collect useful data and information from primary and secondary sources. They examine sources to determine their origin and purpose and to identify different perspectives in the past and present. They interpret data to identify, describe and compare distributions, patterns and trends, and to infer relationships, and evaluate evidence to draw conclusions. Students sequence information about events, the lives of individuals and selected phenomena in chronological order and represent time by creating timelines. They organise and represent data in a range of formats, including large- and small-scale maps, using appropriate conventions. They collaboratively generate alternative responses to an issue, use criteria to make decisions and identify the advantages and disadvantages of preferring one decision over others. They reflect on their learning to propose action in response to an issue or challenge and describe the probable effects of their proposal. They present ideas, findings, viewpoints and conclusions in a range of communication forms that incorporate source materials, mapping, graphing, communication conventions and discipline-specific terms.

Monitoring student learning

Student learning should be monitored throughout the teaching and learning process to determine student progress and learning needs.

Each lesson provides opportunities to gather evidence about how students are progressing and what they need to learn next.

Unit Plan**Plan Name: Unit 3 - HASS Year 6 (V8)****Year:** 6**Status:** Master**Learning Area/Subject:** Humanities and Social Sciences**Duration:** 8 Weeks**Feedback****Feedback to students**

Establish active feedback partnerships between students, teachers and parents to find out:

- what each student already knows and can do
- how each student is going
- where each student needs to go next.

Ensure feedback is timely, ongoing, instructive and purposeful.

Use feedback to inform future teaching and learning.

Reflection on the unit plan

Identify what worked well during and at the end of the unit for future planning.

Teaching Sequence

Topic	Identifying and representing characteristics in places	Topic Duration:	7 Lessons
Overview	Throughout this lesson series, students will: - examine the geographical diversity of the Asia region and the location of its major countries in relation to Australia - investigate differences in the economic, demographic and social characteristics of countries across the world - organise and represent data in large- and small-scale maps using appropriate conventions - interpret data to identify, describe and compare distributions and trends - present ideas, findings and conclusions in a range of communication forms that incorporate source materials, mapping, communication conventions and discipline-specific terms. Spend a short time at the start of each lesson revising concepts, facts or skills and enhancing understanding and fluency. End each lesson with a review of student learning in that lesson.		
Lessons	Teaching and Learning Sequence	Resources	
Lesson 1 Diversity of places	Lesson objectives Students will: - Understand that places, people and cultures differ widely across the world. - Understand how measurements of diversity can be represented. Evidence of learning Can the student: - Define and apply examples to the term 'diversity'? Example learning sequence - Examine the unit focus - Examine the characteristics that influence diversity	Resources - Slideshow - Exploring a diverse world - Sheet - Thinking about differences between places - Supporting learning resource - HASS Glossary Year 6 Unit 3 Attachments Lesson plan	

Unit Plan

Plan Name: Unit 3 - HASS Year 6 (V8)

Year: 6

Status: Master

Learning Area/Subject: Humanities and Social Sciences

Duration: 8 Weeks

Lesson 2 Locating diverse places	Lesson objectives Students will: - Understand that diversity is influenced by the characteristics of places. - Understand how to describe the location of major countries around the world in absolute terms using longitude and latitude. Evidence of learning Can the student: - Identify factors of diversity in a world region? - Describe and record absolute location of selected countries using longitude and latitude? Example learning sequence - Investigate an example of a diverse place (Asia) - Describe and represent the absolute location of a world region (Asia)	Resources - Sheet - Locating diverse places (example: Asia) - Slideshow - Understanding latitude and longitude - Supporting learning resource - Locating diverse places Helpful information - Website - <i>Latitude</i> (KidsGeo) (http://www.kidsgeo.com/geography-for-kids/0014-latitude.php) - Website - <i>Latitude and longitude map match game</i> (KidsGeo) (http://www.kidsgeo.com/geography-games/latitude-longitude-map-game.php) Attachments Lesson plan
Lesson 3 Diverse demographic characteristics	Lesson objectives Students will: - Understand diverse demographic characteristics of places. - Understand how to interpret representations of data about diverse demographic characteristics. - Understand how to represent demographic data in a line graph. Evidence of learning Can the student: - Identify and describe diverse demographic characteristics of places? - Interpret representations of demographic data to draw conclusions? - Represent demographic data in a line graph? Example learning sequence - Examine representations of diverse demographic characteristics of places - Organise and represent demographic data in a line graph - Interpret a line graph to identify a demographic trend	Resources - Sheet - Measuring diversity in demographic characteristics - Slideshow - Diversity of demographic characteristics - Supporting learning resource - Diversity of demographic characteristics - Supporting learning resource - Measuring diversity in demographic characteristics (Answers) Helpful information - Slideshow - Creating a line graph Attachments Lesson plan

Unit Plan

Plan Name: Unit 3 - HASS Year 6 (V8)

Year: 6

Status: Master

Learning Area/Subject: Humanities and Social Sciences

Duration: 8 Weeks

Lesson 4 Diverse economic characteristics	Lesson objectives Students will: - Understand diverse economic characteristics of places. - Understand how to interpret representations of data to draw conclusions about diverse economic characteristics. - Understand how to represent economic data in a choropleth map. Evidence of learning Can the student: - Identify and describe diverse economic characteristics of places? - Interpret representations of economic data to draw conclusions? - Represent economic data in a choropleth map? Example learning sequence - Examine representations of the diverse economic characteristics of places - Interpret data represented in a choropleth map to identify the economic differences between places - Represent an economic pattern in a choropleth map	Resources - Slideshow - Diversity of economic characteristics - Sheet - Diversity of economic characteristics - Supporting learning resource - Diversity of economic characteristics (Answers) Attachments Lesson plan
Lesson 5 Diverse social characteristics	Lesson objectives Students will: - Understand diverse social characteristics of places. - Understand how to interpret representations of data about diverse social characteristics. - Understand how to describe and represent the location of places. Evidence of learning Can the student: - Identify and describe diverse social characteristics of places? - Interpret representations of social data to draw conclusions? - Describe and represent the location of places? Example learning sequence - Examine representations of the diverse social characteristics of places - Interpret data to compare patterns in the diverse social characteristics of places - Describe and represent the location of places with diverse social characteristics	Resources - Slideshow - Diversity of social characteristics - Sheet - Diversity of social characteristics - Supporting learning resource - Diversity of social characteristics (Answers) Attachments Lesson plan

Unit Plan

Plan Name: Unit 3 - HASS Year 6 (V8)

Year: 6

Status: Master

Learning Area/Subject: Humanities and Social Sciences

Duration: 8 Weeks

Lesson 6 Interpreting data about diversity	Lesson objectives Students will: - Understand how to interpret representations of diversity. Evidence of learning Can the student: - Interpret representations of diversity to identify and describe diverse characteristics of places? Example learning sequence - Review diversity - Examine representations of data relating to diversity - Interpret representations of data relating to diversity	Resources - Sheet - Interpreting representations of diversity data - Slideshow - Interpreting representations of diversity - Supporting learning resource - Interpreting representations of diversity data (Answers) Helpful information - Website - <i>Data in Gapminder World</i> (Gapminder) (http://www.gapminder.org/data/) Attachments Lesson plan
Lesson 7 Assessment checkpoint: Part A	Assessment purpose To demonstrate an understanding of the diversity of places by representing, interpreting and describing data and information about the characteristics of places. Example learning sequence - Understand the assessment - Review the <i>Guide to making judgments</i> and understand the standards A-E - Conduct the assessment	Resources - Assessment task - <i>Australia in a diverse world</i> - Assessment task - <i>Australia in a diverse world: Sources</i> - Assessment task - <i>Australia in a diverse world: Model response</i> - Assessment task - <i>Australia in a diverse world: Teaching notes</i> Attachments Lesson plan

Duration: 8 Weeks

Teaching Sequence

Topic	Describing the diversity of places	Topic Duration:	9 Lessons
Overview	Throughout this lesson series, students will: - describe, compare and explain the diverse characteristics of different places in different locations from local to global scales - describe how people, places, communities and environments are diverse. Spend a short time at the start of each lesson revising concepts, facts or skills and enhancing understanding and fluency. End each lesson with a review of student learning in that lesson.		
Lessons	Teaching and Learning Sequence	Resources	
Lesson 8 Our Asian neighbours	Lesson objectives Students will: - Understand the geographical division of Asia and the location of major countries in Asia in relation to Australia. Evidence of learning Can the student: - Identify and represent the geographic divisions of Asia into regions and countries using cartographic conventions? - Use latitude and longitude to describe absolute location of places in Asia? Example learning sequence - Represent the location of Asian countries and sub-regions using cartographic conventions - Describe the relative location of selected countries in Asia - Describe the absolute location of selected places in Asia	Resources - Sheet - Our Asian neighbours - Supporting learning resource - Our Asian neighbours (Answers) Attachments Lesson plan	

Unit Plan

Plan Name: Unit 3 - HASS Year 6 (V8)

Year: 6

Status: Master

Learning Area/Subject: Humanities and Social Sciences

Duration: 8 Weeks

Lesson 9 Environmental diversity in Asia	Lesson objectives Students will: - Understand diverse environmental characteristics of Asia. Evidence of learning Can the student: - Describe diverse environmental characteristics of Asia? - Explain reasons for the diverse environmental characteristics of Asia? Example learning sequence - Examine environmental diversity in Asia - Describe and represent the location of selected environmental characteristics - Interpret data to describe environmental diversity in Asia	Resources - Slideshow - Area reference - Slideshow - Diversity of environmental characteristics of Asia - Sheet - Diverse environmental characteristics: Asia - Supporting learning resource - Diverse environmental characteristics: Asia (Answers) Helpful information - Supporting learning resource - Area reference Attachments Lesson plan
Lesson 10 Human diversity in Asia	Lesson objectives Students will: - Understand diverse human characteristics of selected Asian countries. Evidence of learning Can the student: - Describe and explain diverse human characteristics of Asia? Example learning sequence - Examine human diversity in Asia - Interpret data to identify patterns, trends and to infer relationships in human diversity in Asia	Resources - Slideshow - Diversity of human characteristics in selected countries of Asia - Sheet - Diverse human characteristics: Asia - Supporting learning resource - Diverse human characteristics: Asia (Answers) Attachments Lesson plan

Unit Plan

Plan Name: Unit 3 - HASS Year 6 (V8)

Duration: 8 Weeks

Assessment Task - Marking Guide				
Assessment Task Name:	Australia in a diverse world (Yr 06)		Technique:	Assignment/Project
			Date:	TBA
Description:	Students demonstrate an understanding of the diversity of places by representing, interpreting and describing data and information about the characteristics of places.			
Learning Area/Subject	Humanities and Social Sciences			
	Knowledge and Understanding	Questioning and researching	Analysing, evaluating and reflecting	Communicating
	Describe, compare and explain the diverse characteristics of different places in different locations from local to global scales. Describe how people, places, communities and environments are diverse and globally interconnected and identify the effects of these interconnections over time.	Organise and represent data in a range of formats, including large- and small-scale maps, using appropriate conventions.	Interpret data to identify, describe and compare distributions, patterns and trends, and to infer relationships, and evaluate evidence to draw conclusions.	Present ideas, findings, viewpoints and conclusions in a range of communication forms that incorporate source materials, mapping, graphing, communication conventions and discipline-specific terms.
A	◀ Provides detailed explanations of diverse characteristics of places.	◀ Accurately represents data and information in tables and on large- and small-scale maps.	◀ Explains interconnections with references to relevant data.	◀ Structures ideas, findings and conclusions about diverse characteristics.
B	◀ Makes connections between the characteristics of places.	◀ Estimates and records the absolute location of places in a table and on a small-scale map.	◀ Evaluates multiple data sets to identify interconnections.	◀ Applies an accurate knowledge of discipline-specific terms.
C	◀ Describes, compares and explains the diverse characteristics of different places in different locations. Describes how people, places, communities and environments are diverse.	◀ Organises and represents data in a range of formats, including tables, large- and small-scale maps, using appropriate conventions.	◀ Interprets data to identify, describe and compare distributions and trends, to infer relationships, and evaluate evidence to draw conclusions.	◀ Presents ideas, findings and conclusions in a range of communication forms, incorporating source materials, mapping and communication conventions and discipline-specific terms.
D	◀ Identifies diverse characteristics of places.	◀ Records latitudinal and longitudinal data in a table.	◀ Uses data to support findings and conclusions.	◀ Uses appropriate language and information relevant to sources.
E	◀ Acknowledges that characteristics of places can be diverse.	◀ Labels a map.	◀ Acknowledges source information.	◀ Communicates ideas.

Unit Plan**Plan Name: Unit 3 - HASS Year 6 (V8)****Year: 6****Status:** Master**Learning Area/Subject:** Humanities and Social Sciences**Duration:** 8 Weeks**Acknowledgement, Disclaimer and Copyright**
