## Unit Plan

### People and the environment

In this unit, students will explore the following inquiry question:

- *How do people and environments influence one another?*

Learning opportunities support students to:

- examine the characteristics of places in Europe and North America and the location of their major countries in relation to Australia
- describe the relative location of places at a national scale
- identify and describe the human and environmental factors that influence the characteristics of places
- examine the interconnections between people and environments
- investigate the impact of human actions on the environmental characteristics of places in Europe and North America
- organise data in a range of formats using appropriate conventions
- interpret data to identify simple patterns, trends, spatial distributions and infer relationships
- evaluate evidence about the characteristics of places to draw conclusions about preferred places to live
- present findings and conclusions using discipline-specific terms.

For further information to support teaching of the unit, view the:

- [Year level plan](#)
- [Teacher lesson overview](#)

## Unit Plan

Plan Name: Unit 1 - HASS Year 5 (V8)

Year: 5

Status: Master

Learning Area/Subject: Humanities and Social Sciences

Duration: 8 Weeks

Throughout the unit, ensure all students have opportunities to develop their higher-order thinking skills. Students develop skills in thinking when they are encouraged to reflect, inquire, generate, and analyse, synthesise and evaluate. Resources that support higher-order thinking skills:

- Helpful information - [Higher-order thinking skills Years P-9](#)

Throughout this unit, students will require ready access to ICT at a whole-class, small-group and individual level. Such ICT include spreadsheet software, graphing software, graphic calculators or mobile device apps. **Note:** A mobile device is a portable computing device, typically having a display screen with touch input or a miniature keyboard. Ensure that the use of ICT in the classroom, including mobile devices, complies with DET policy requirements - [Advice for State Schools on Acceptable Use of ICT Facilities and Devices](#).

## Unit Plan

Plan Name: Unit 1 - HASS Year 5 (V8)

Year: 5

Status: Master

Learning Area/Subject: Humanities and Social Sciences

Duration: 8 Weeks

## Australian Curriculum

## F-6/7 HASS- Year 5

## Year 5 Achievement Standard

By the end of Year 5, students describe the significance of people and events/developments in bringing about change. They identify the causes and effects of change on particular communities and describe aspects of the past that have remained the same. They describe the experiences of different people in the past. Students explain the characteristics of places in different locations at local to national scales. They identify and describe the interconnections between people and the human and environmental characteristics of places, and between components of environments. They identify the effects of these interconnections on the characteristics of places and environments. Students identify the importance of values and processes to Australia's democracy and describe the roles of different people in Australia's legal system. They recognise that choices need to be made when allocating resources. They describe factors that influence their choices as consumers and identify strategies that can be used to inform these choices. They describe different views on how to respond to an issue or challenge.

Students develop questions for an investigation. They locate and collect data and information from a range of sources to answer inquiry questions. They examine sources to determine their purpose and to identify different viewpoints. They interpret data to identify and describe distributions, simple patterns and trends, and to infer relationships, and suggest conclusions based on evidence. Students sequence information about events, the lives of individuals and selected phenomena in chronological order using timelines. They sort, record and represent data in different formats, including large-scale and small-scale maps, using basic conventions. They work with others to generate alternative responses to an issue or challenge and reflect on their learning to independently propose action, describing the possible effects of their proposed action. They present their ideas, findings and conclusions in a range of communication forms using discipline-specific terms and appropriate conventions.

## Content Descriptions

## Inquiry and skills

*Evaluating and reflecting*

- Evaluate evidence to draw conclusions ([ACHASSI101](#))
- Use criteria to make decisions and judgements and consider advantages and disadvantages of preferring one decision over others ([ACHASSI103](#))

*Communicating*

- Present ideas, findings, viewpoints and conclusions in a range of texts and modes that incorporate source materials, digital and non-digital representations and discipline-specific terms and conventions ([ACHASSI105](#))

*Analysing*

- Interpret data and information displayed in a range of formats to identify, describe and compare distributions, patterns and trends, and to infer relationships ([ACHASSI100](#))

## Knowledge and Understanding

*Geography*

- The environmental and human influences on the location and characteristics of a place and the management of spaces within them ([ACHASSK113](#))
- The influence of people on the environmental characteristics of places in Europe and North America and the location of their major countries in relation to Australia ([ACHASSK111](#))

**Unit Plan****Year:** 5**Learning Area/Subject:** Humanities and Social Sciences**Plan Name:** Unit 1 - HASS Year 5 (V8)**Status:** Master**Duration:** 8 Weeks**Curriculum Priorities - Pedagogy****Considerations****Prior and future curriculum****Relevant prior curriculum**

Students require prior experience with the following:

- Locate and collect information and data from different sources, including observations (ACHASSI074)
- Record, sort and represent data and the location of places and their characteristics in different formats, including simple graphs, tables and maps, using discipline-appropriate conventions (ACHASSI054)
- Interpret data and information displayed in different formats, to identify and describe distributions and simple patterns (ACHASSI057)
- Reflect on learning to propose actions in response to an issue or challenge and consider possible effects of proposed actions (ACHASSI060)
- Present ideas, findings and conclusions in texts and modes that incorporate digital and non-digital representations and discipline-specific terms (ACHASSI082)

**Curriculum working towards**

The teaching and learning in this unit work towards the following:

- Locate and collect relevant information and data from primary sources and secondary sources (ACHASSI123)
- Organise and represent data in a range of formats including tables, graphs and large- and small-scale maps, using discipline-appropriate conventions (ACHASSI124)
- Interpret data and information displayed in a range of formats to identify, describe and compare distributions, patterns and trends, and to infer relationships (ACHASSI128)
- Use criteria to make decisions and judgements and consider advantages and disadvantages of preferring one decision over others (ACHASSI131)
- Present ideas, findings, viewpoints and conclusions in a range of texts and modes that incorporate source materials, digital and non-digital representations and discipline-specific terms and conventions (ACHASSI133)

**Unit Plan****Plan Name: Unit 1 - HASS Year 5 (V8)****Year:** 5**Status:** Master**Learning Area/Subject:** Humanities and Social Sciences**Duration:** 8 Weeks**General capabilities**

This unit provides opportunities for students to engage in the following general capabilities.

**Literacy**

- Comprehending texts through listening, reading and viewing
- Composing texts through speaking, writing and creating
- Grammar knowledge
- Word knowledge

**Numeracy**

- Recognising and using patterns and relationships
- Using spatial reasoning
- Interpreting statistical information

**Information and communication technology (ICT) capability**

- Investigating with ICT

**Critical and creative thinking**

- Inquiring - identifying, exploring and organising information and ideas
- Generating ideas, possibilities and actions
- Reflecting on thinking and processes
- Analysing, synthesising and evaluating reasoning and procedures

**Personal and social capability**

- Self-management

For further information, refer to General capabilities in the Australian Curriculum and the Learning area specific advice.

**Unit Plan****Plan Name: Unit 1 - HASS Year 5 (V8)****Year: 5****Status:** Master**Learning Area/Subject:** Humanities and Social Sciences**Duration:** 8 Weeks**Assessing student learning****Assessment name: People and the environment**

Assessment description: Students investigate the characteristics of places and use evidence to draw conclusions about a preferred place to live.

In this unit, assessment of student learning aligns to the following aspects of the achievement standard.

By the end of Year 5, students describe the significance of people and events/developments in bringing about change. They identify the causes and effects of change on particular communities and describe aspects of the past that have remained the same. They describe the experiences of different people in the past. Students explain the characteristics of places in different locations at local to national scales. They identify and describe the interconnections between people and the human and environmental characteristics of places, and between components of environments. They identify the effects of these interconnections on the characteristics of places and environments. Students identify the importance of values and processes to Australia's democracy and describe the roles of different people in Australia's legal system. They recognise that choices need to be made when allocating resources. They describe factors that influence their choices as consumers and identify strategies that can be used to inform these choices. They describe different views on how to respond to an issue or challenge.

Students develop questions for an investigation. They locate and collect data and information from a range of sources to answer inquiry questions. They examine sources to determine their purpose and to identify different viewpoints. They interpret data to identify and describe distributions, simple patterns and trends, and to infer relationships, and suggest conclusions based on evidence. Students sequence information about events, the lives of individuals and selected phenomena in chronological order using timelines. They sort, record and represent data in different formats, including large-scale and small-scale maps, using basic conventions. They work with others to generate alternative responses to an issue or challenge and reflect on their learning to independently propose action, describing the possible effects of their proposed action. They present their ideas, findings and conclusions in a range of communication forms using discipline-specific terms and appropriate conventions.

**Monitoring student learning**

Student learning should be monitored throughout the teaching and learning process to determine student progress and learning needs.

Each lesson provides opportunities to gather evidence about how students are progressing and what they need to learn next.

**Feedback****Feedback to students**

Establish active feedback partnerships between students, teachers and parents to find out:

- what each student already knows and can do
- how each student is going
- where each student needs to go next.

Ensure feedback is timely, ongoing, instructive and purposeful.

Use feedback to inform future teaching and learning.

**Reflection on the unit plan**

Identify what worked well during and at the end of the unit for future planning.
